PROFESSIONAL SUMMARY

Data Analyst and MCA graduate with hands-on experience in Python, SQL, and data visualization. Skilled in performing data cleaning, exploratory data analysis (EDA), and building analytical dashboards to derive actionable insights from structured and unstructured datasets. Proven track record working in startup environments across two organizations (Weloin Technologies & Vision Innovations) with expertise in backend development, API integration, and data-driven applications. Passionate about leveraging data analytics, machine learning, and visualization tools (Power BI, Matplotlib) to support business decision-making and drive measurable outcomes.

TECHNICAL SKILLS

Programming:	Python, SQL, JavaScript, HTML, CSS
Data Analysis:	Pandas, NumPy, Scikit-learn, Data Cleaning, EDA, Feature Engineering, Statistical Analysis
Visualization:	Power BI, Matplotlib, Seaborn, Tableau (Basic), Excel (Basic)
Databases:	PostgreSQL, MongoDB, MySQL, Database Design, Query Optimization
Tools & Platforms:	Git, GitHub, Docker, Postman, AWS (Basic), GCP (Basic), Jupyter Notebook
Frameworks:	FastAPI, Flask, React, TensorFlow, PyTorch, Sentence Transformers

PROFESSIONAL EXPERIENCE

Developer (Startup) — Vision Innovations

Oct 2025 – Present

- Developed backend services and data-driven application features for medical imaging platform using Python and FastAPI
- Built RESTful APIs for camera calibration data processing, enabling real-time metrics tracking and storage optimization
- Implemented data pipeline architecture for auto-capture (.jpg) and manual capture (.npz) with structured file management
- Designed PostgreSQL database schemas for patient imaging data, calibration metrics, and user authentication
- Created analytics dashboards for real-time monitoring of camera feed metrics (FPS, marker detection, baseline measurements)

Software Engineering Intern — Weloin Technologies

Jul 2025 – Sep 2025

- Developed FastAPI backend services for vector search and embedding-based NLP applications with 95%+ query accuracy
- Implemented sentence-transformers for text embeddings and cosine similarity algorithms for efficient information retrieval
- Worked with PostgreSQL and Docker for managing structured data, embeddings storage, and containerized deployment
- Optimized data retrieval performance by 40% through query optimization and indexed similarity search implementation

KEY PROJECTS

Health Insurance Premium Prediction & Analysis

Apr 2023 – Apr 2024

Tech Stack: Python, Pandas, Scikit-learn, Matplotlib, NumPy, MERN Stack

- Built machine learning regression model predicting insurance premiums with 83%+ accuracy using Random Forest and XGBoost
- Cleaned and processed 1,300+ customer records using Pandas, handling missing values, outliers, and categorical encoding
- Performed comprehensive exploratory data analysis (EDA) revealing key factors: age, BMI, smoking status impact premiums

Dairy Management System with Analytics Dashboard

Jan 2022 – Apr 2022

Tech Stack: PHP, MySQL, Bootstrap, JavaScript

- Developed full-stack management system handling 500+ daily transactions with inventory tracking and billing automation
- Designed MySQL database with normalized schema for customer records, transactions, and inventory management
- Built analytics dashboard showing daily sales trends, top customers, inventory levels, and revenue forecasting

EDUCATION

Master of Computer Applications (MCA) — JIS College of Engineering, Kalyani, WB

Graduated: 2024 | Score: 70% | Relevant Coursework: Database Management, Data Structures, Statistical Analysis

Bachelor of Science (B.Sc.) — Kanchrapara College, WB

Graduated: 2022 | Score: 83%
